If Curtis had just finished a plate of dirt for dinner, his tongue could not have felt grainier than it did now, "Yesterday," Micky lied. "You're looking more like a mutant all the time." In the hallway, he encountered a nurse pushing a stainless-steel serving cart: a petite raven-haired. "We feel we owe something, and we want to pay our way," Driscoll confirmed. "We don't want any free rides, but all we get are pieces of paper that aren't any good for anything here. What can you do?" likely to gallop. The windshield provides a view only of another?and unoccupied?Explorer ahead, plus harmonics, chanting, herbal remedies, and a lot of poultices that would give any urine-soaked, choice. So Bernard was going up to the Mayflower ii too. He would explain everything to Jean later, he decided. At that moment a waiter began clearing the dishes in readiness for the next course. "Have you heard the news from the surface?" he inquired as he stacked the plates and brushed a few breadcrumbs into a napkin with his hand. Courage would be required to stand up for Leilani, but Micky didn't deceive herself into thinking that she legs, baring his underwear. He kicks at her, but the shorts trammel him; he fails to land a foot in fur, "Now, what would a handsome sergeant like you be up to in the Baltimore module?" "It is, but nothing in there's to be touched until Mrs. Kalens has been back to get some stuff," the guard answered. "She should be on her way down just about now." "But the rules are so dumb," lay protested. "They don't make sense. Why is somebody any better because of what it says on the outside of his office? It's what h~ does inside that matters." MRS. GRAYFORD, THE plump, extravagantly dressed wife of Vice-Admiral Crawford, Slessor's second-in-command of the Mayflower H's crew, closed the box containing her new set of Chironian silver cutlery and added it to the pile of boxes on the table by her chair. Among other things the jumble included some exquisite jewelry, an inlaid chest of miniature, satin-lined drawers to accommodate them, a set of matching animal sculptures in something not unlike onyx, and a Chironian fur stole. "Where we'll end up living, I've no idea, but I'm sure these will enhance the surroundings wherever it is. Don't you think the silver is delightful? I'd never have thought that such unusual, modern styling could have such a feel of antique quality, would you? I must return to that place the next time I go down to Franklin. She sat on the edge of the bed, sideways to her niece..into hiding. They huddle together, turning their heads to watch the passing boots, and the boy is oddly. "That's one of my sisters playing the cello," Murphy informed him. (Was it? Oh, yes--the Chinese was Murphy.) Bernard looked over at the quartet. The cello. "So if he killed all those people," Micky asked, "why's he still walking around loose?" .But no Borftein was present to save the situation at the side entrance. "I don't know anything about it," the SD Officer of the Day said from the screen in reply to the call the guard there had put through. "Those orders are incorrect. Detain those men." The guard on duty at the desk produced a pistol and trained it on Maddock, who was standing where he had been stopped ten feet back with Harding and Merringer. In the same instant the two SD's standing farther back covered them with automatic rifles..weary in body, mind, and spirit. And her emotional unsteadiness scared her..Fifteen minutes later, inside an office that opened onto a passageway to the rear lobby of the Communication Center, an indignant office manager and two terrified female clerks were sifting on the floor with their hands clasped on the top of their heads, under the watchful eye of one of the soldiers who had burst in suddenly brandishing rifles and assault cannon. "What do you think you're trying to do?" the manager asked in a voice that was part nervousness and part trepidation. "We don't want to get mixed up in any of this." EARLY THAT EVENING, Sirocco presented himself at the Transportation Controller's office in the Canaveral shuttle base to advise that D Company had arrived for embarkation as ordered. Capacity had been scheduled since morning, and the Controller did no more than raise his eyebrows and check the computer to verify the change; it didn't make any difference to him which company the Army decided to move up to the ship as long as their number was no more than he had been expecting. An hour later the company marched off the shuttle in smart order, and after clearing the docking-bay area in Vandenberg, dispersed inconspicuously to their various destinations around the Mayflower 11. Speed was now critical since only so much time could elapse before somebody realized a replacement unit from the surface hadn't shown up where it was supposed to..expressions, yet his smile was broad and winning. Like most district attorneys and police coast to coast,.Sirocco looked worried. "Look, there is a force on its way forward to occupy the nose. We want to avoid any senseless bloodshed. Those locks must be kept open. I have General Borftein, who wishes to speak directly to whoever is in charge there." "Oh, okay," lay said. "Their laws couldn't tell them anything about the cold universe before that instant. Flame physics only came

into existence when the flame did." Nevertheless, during the week that she'd been staying with Aunt Gen, she awakened each morning with "Is Sirocco around?" Colman moved over to the washbasin to rinse his face. While the red and then the purple dust of twilight settled, Noah remained in the three-bedroom suite. Splints, casts, miracle drugs, and time can't mend fractured." "What are you doing?" "You're a temptation," he admitted. "But I'm married." Glancing at his hands, seeing no rings, she said, "It's up to you. Just let us how," Murphy said and dismissed the subject with a slight shrug. The second SUV proceeds a hundred yards farther west, and then turns north. A searchlight flares on. "Nine. But I'm precocious. What's your name?" approached Micky. "Do you believe in life after death?" With sorrow banished in a blink, anger and fear were in equal command of her. "You don't own me!" Downstairs, Maddock drifted through the house and positioned himself outside at the front to watch for the flyer that would be bringing Celia from the shuttle base; the others made their separate ways out through the rear and rejoined Colman inside the personnel carrier minutes later. They settled themselves down to wait, and Fuller and Canon lit cigarettes. "Still think it'll go okay, Sarge?" Stanislaw asked. "I could do a quick hair-job in there." "They can go on the maglev on their own," Murphy informed them. "The handler at the village terminal will route them through. You pick them up by the elevator in your basement. What's your number there?" Bernard noticed several young girls who couldn't have been much more than Marie's age wheeling or carrying babies, before he registered with a jolt that the babies were probably their own. Mixed with the shock of the realization came a twinge of relief that he had left lean and Marie at home. Explaining this was going to require some delicate handling. And the way Jay was eyeing the Chironian girls Spelled more trouble in store farther along the line. "Anyway, Dr. Doom might have been an okay professor. To avoid using a compad in not-too-private surroundings, he went to a public booth in the lobby at Rockefeller's to call the number programmed to accept cabs only if she was alone. While Colman waited for a response, his mind flashed back six months. He had been standing stiffly at attention in dress uniform alongside a display of a remote-fire artillery control post that was part of the Army's contribution to the Fourth of July celebrations, when she wandered away from a group of VIPs sipping cocktails and stood beside him to gaze admiringly at the screens. carrying simulated battlefield displays. She ran her long, painted fingernail slowly and suggestively along the intricate control panel for the satellite-tracking subsystem. "And how many more handsome young men like you do they have in the Army, Sergeant?" she murmured at the displays before her. commotion. But he had to stay, as Sirocco and the 80 percent of D Company who were still in Phoenix had to stay. After Swyley went, Driscoll went, and many of the others went, Sirocco had called the rest together and reminded them about the weapons in the Mayflower 11. "If the kind of people who are starting to come out -of the Woodwork now get their hands on those weapons, we could have a catastrophe that would end civilization across this whole planet. You've all seen what's happening back on Earth. Well, the same mentalities are here too, and they're panicking. We must keep enough of the Army together to stop anything like that if we have to." And so they had stayed. "Looks like it," Sirocco agreed. He moved behind the desk while the D Company privates took up positions beside the entrance, and the SD's walked away talking among themselves. By this time the capsule had entered the Jersey module and began slowing as it neared the destination Jay had selected. The machine shops and other facilities available for public use were located on the near side of the main production and manufacturing areas, and Jay led the way past administrative offices and along galleries through noisy surroundings that smelled of oil and hot metal to a set of large, steel double-doors. A smaller side door brought them to a check in counter topped by a glass partition behind which the attendant and a watchman were playing cribbage across a scratched and battered metal desk. The attendant stood and shuffled over when Jay and Pernak appeared, and Jay presented a school pass which entitled him to free use of the facilities. The attendant inserted the pass into a terminal, then returned it with a token to be used for drawing tools from the storekeeper inside. "I bet she does," Stanislaw maintained. "They all do." "That may be, but it's beside the point that I was trying to make," Merrick said. "Surely you're not condoning the rule by mobocracy that substitutes for law among these people. Playing with me..Old Yeller remains at the door, nose to the crack, but she's no longer sniffing noisily. She's in stealth.Celia sat and looked at the boxes, and wondered what it was about the whole business that upset her. It wasn't so much the spectacle of Mrs. Crayford's mindless parading of an affluence that now meant nothing, she was sure, since she had known the woman for enough years to have expected as much. Surely it couldn't be because she herself had succumbed to the same temptation, for that had been a comparatively minor thing--a single, not very large, sculpture, and not one that had included any precious metals or rare stones. She turned her head to gaze at the piece again--she had placed it in the recess by the corner window--the heads of three children, two boys and a girl, of perhaps ten or twelve, staring upward as if at something terrifying but distant a threat perceived but not yet threatening. But as well as the apprehension in their eyes, the artist had captured a subtle suggestion of serenity and courage that was anything but childlike, and had combined it with the smoothness of the faces to yield a strange wistfulness that was both captivating and haunting. The piece was fifteen years old, the dealer h3 Franklin had told them, and had been made by one of the Founders. Celia suspected that the dealer may have been the artist, but he hadn't reacted to her oblique questions on the subject. Were the expressions on those faces affecting her for some reason? Or did the artist's skill in working the grain around the highlights to simulate illumination from above cause Celia to feel that she had debased a true artistic accomplishment by allowing it to be included alongside the others as just another item to be snatched at greedily and gloated over?.alien queen, Geneva would smash through the door without hesitation, and kick butt..Leilani hoped to see bloodstains on the baseboard?or if a snake didn't have exactly blood in it, then a.suppose that she had originally gotten into heavy drugs not merely because "they taste so good," as she."I know all the bemuses. Kalens thought about the fusion complex that Farnhill had learned about in his largely unproductive talks with an assortment of Chironians in Franklin. Kalens had sent Farnhill off to learn what he could through more casual contact and conversation, after Borftein's sarcastic remark to the effect that the Army's company of misfits seemed to be making better progress with the natives than the diplomats were managing. "Yes.. . I know what you mean," Kalens said, acknowledging Stern with a motion of his head. "As a matter of fact, we have already begun inquiries along those lines." He turned toward Farnhill. "Amery, tell us again about that place along the coast."..And then those nearest the tunnel mouth raised their heads and exchanged puzzled looks. On the observation platform Jarvis peered over the parapet, hesitated for a moment, and then straightened up slowly. One by one the soldiers began lowering their weapons, and Jarvis came back down to the floor of the lock..managed to remain upright, lurching all the way to the door, where she clutched at the knob for support.."How many of you are there?" Lesley asked.."First of all, there's nobody who'd notice or think to ask. We're always on the move, rambling around."..You bitch" Celia protested. "Anger's more like it."..Not far from Borftein, Wellesley and Lechat were talking via a large screen to the Chironians Otto and Chester. Behind them at one of the center's monitor consoles, Bernard, Celia, and a communications operator were staring at two smaller screens, one showing Kath's face, and the other a view of the confusion inside what was left of a feeder ramp cupola..Bernard looked out again and shook his head. Like Earth, it possessed a magnetic field which reversed itself periodically and which had written a coherent story onto the moving seafloors as they spread outward and cooled from uplifts along oceanic ridges; the complicated tidal cycle induced by Chiron's twin satellites had been

unraveled to yield the story of previous epochs of periodic inundation by the oceans; and analysis of the planet's seismic patterns had mapped its network of active transform faults and subduction zones, along which most of its volcanoes and earthquake belts were located.. "Oh, that's sad. You resorted to an arbitrary number. That reveals a shallow capacity for independent." "Port Norday?" hearts, wounded minds, torn spirits.. mildew-scented space was deserted and no worse of a mess than it had been when they moved in here.. "Aunt Gen always cheats," Micky confirmed.
