Padawski was glowering from a few feet away, and seemed to have regained some of his confidence now that the SD's were in control. "You stay away from her, Goldilocks," he spat. "Stick with your nice, murdering friends. We won't forget you either." 1-Ic turned his head back to glare at the whole room before turning for the door. "And that goes for all of you," he warned in a louder voice. "We won't forget. You'll see." For a while after the girl had gone into the neighboring house trailer, Micky sat forward in the lounge. I'm talking around?". different reasons. Some serpents were more frightening than others: the specimens that didn't come in. "For being a good soldier and a lousy citizen." The chopper might not be aloft yet, just getting up to power while the troops reboard.. Bernard shrugged. "What the hell? It's done now. We needed the exercise." A long silence went by while they took it all in. It meant that ever since planetfall, the Mayflower II had been shadowed in orbit around Chiron by a weapon that could blow it to atoms in an instant. And the camouflage had been perfect; the Terrans themselves had put it there. It was the most lethal piece of weaponry ever conceived by the human race. No wonder the Chironians had been able to cover every bet put on the table and play along with every bluff. They could let the stakes go as high as anybody wanted to raise them and wait to be called; they'd been holding a pat hand all the time. Or was it the Smith and Wesson that Chang had mentioned at Shirley's, perhaps not so jokingly?. fearfully aware of ever-looming death as his master is, which would be sad. And the boy figures that. Currently, sunshine was Micky Bellsong's medication of choice, and southern California in late August. But she saw no blood, no ichor, no snake syrup of any kind.. "On the contrary, Mr. Stern, they understand the same language that people everywhere speak," Chester said. "We will deal with them in the same way that we have already dealt with you." "Aw, I wasn't watching it." Jay waved vaguely with the book and returned it to its shelf. "Usual stuff." Leon nodded gravely from his section of the screen. . "That is a risk," he agreed. "As Otto said, it is difficult to judge exactly. However, we think that the policy we have outlined minimizes risks to the majority of people. Nothing will eliminate the risks completely." He drew a long, heavy breath before answering Bernard's question directly. "But there can be no alteration of our resolution." "I just don't like news," Micky explained. "It's mostly bad, and when it isn't bad, it's mostly lies." part misery and part fury, as she jabbed the lance hard at the coiled target.. wasn't any longer able to make sense of her mother's words, she figured the woman's sympathies were. be dead for sure. As one, the two cowboys start toward Curtis.. sight to see with this leg brace." As though to prove how tough she was, Leilani crumpled the empty beer. He quietly slips the bolt on the right, holds the gate with one hand as he moves to the left, slips that bolt.. "It's okay, Driscoll," Sirocco called ahead as the party came into sight around a bend in the wall. "Forget the pantomime. We're back in the Bomb Factory." Driscoll relaxed his pose and sent a puzzled look along the corridor.. By midmorning Terran newscasters were interpreting the development as a Chironian backlash to the Padawski outrages and as a warning to the Terrans of what to expect if Kalens was elected to head the next administration after his latest public pledge to impose Terran law on Franklin as a first step toward "restabilizing" the planet. Interviews in which Chironians denied, dispassionately and without embellishment, that they had had anything to do with the incidents were given scant coverage. Reactions among the Terrans were mixed. At one extreme were the protest meetings and anti-Chironian demonstrations, which in some cases got out of hand and led to mob attacks on Chironians and Chironian property. At the other, a group 'of two hundred Terrans who believed the bombings to have been the work of the Terran anti-Chironian extremists announced that they were leaving en masse and had to be stopped by a cordon of troops. Before they could disperse they were attacked by an inflamed group of anti-Chironians, and in the ensuing brawl the Chironians looked on as impassive spectators while Terrans battled' Terrans, and Terran troops in riot gear tried to separate them.. penetrating, as air finds its

"If it wouldn't be any trouble to anyone. You must have talked to the two guys who were here earlier." If Curtis had just finished a plate of dirt for dinner, his tongue could not have felt grainier than it did now. Leilani is as good as dead. "He wasn't dead then," Geneva assured the girl. "He hadn't even begun to lose his hair yet." "We could probably arrange a visit for you too," Chang offered. "There's a large fusion complex along the coast that supplies power and all kinds of industrial materials for most of Franklin. Another one's due to be built soon, and they'll be needing people too. I could arrange for you to go and see it, if you think you'd be interested." From the corner of her eye, Micky was aware that the girl had stopped working and had turned to face. Providing for Laura was the reason that he worked, the reason that he lived in a low-rent apartment, hollow note in this confined space. someone's attic trunk for decades. THE CHIRONIANS' HANDLING of the Padawski incident and the absence of any organized reaction among them to the initial Terran hysteria led to a widespread inclination among the Terrans privately to absolve the Chironians of blame over the bombings, but the Terrans avoided thinking about the obvious question which that implied. The aftertaste of guilt and not a little shame left in many mouths alienated the Terran extremists from the majority, and relations with the Chironians quickly returned to normal. Nevertheless, the wheels that had been set in motion by the affair continued to turn regardless, and five days later the Territory of Phoenix was declared to exist. GENEROUS SLICES of homemade apple pie. Simple white plates bought at Sears. Yellow plastic. An abandoned bicycle on its side. A grape arbor is entwined with vines, clothed with leaves, hung with. Colman looked away in a daze. Hanlon and Armley were waiting impatiently, and Jay was watching imploringly. He thought furiously. Why Celia should be in danger and desperate to escape, he didn't know, but he could find out later. If he said he had to get away for a few hours. Sirocco would cover for him, so that was okay. The threat of the Chironians' being able to destroy the ship was obviously the most serious problem but there was little likelihood of that becoming critical within the next few hours; on the other hand, Celia was already committed to whatever she and Veronica had cooked, up between them, and that couldn't be delayed or changed. So Celia would have to come first. Jay could go home and tell his father that Colman would be a while; at the same time Jay would be able to warn the Fallowses to be prepared for more company, since Colman would have to take Celia there with him. In fact that would probably work out pretty well since it would enable her to be smuggled out of Phoenix in one operation with Bernard and the other fugitive that Jay had mentioned. Vehicles flying out of Phoenix were programmed to operate only inside a narrow corridor unless specifically authorized to go to some other destination, so the smuggling would have to be across the border. He could fix something with Sirocco back in the Orderly Room, no doubt, but that was a relatively minor issue since Colman was already adept at getting himself in and out of Phoenix. As for Veronica's getting away from the base, he would have to leave that to Hanlon. "What do you mean?" Lechat asked, although in the same instant he thought he knew. pane, as though showcased: visible above the waist, nude. Jonathan Sharmer, also nude, loomed behind. "Sirocco, D Company commander, Second Infantry Brigade. Is your commanding officer there?". He set the coffees down and slid into the seat opposite Jay. "Ever been thirsty?" he asked as he stirred sugar into his cup. She placed the first-aid kit on the bed, beside her mother's digital camera. With the thumb on her deformed hand, Leilani gestured toward Geneva, and said to Micky, "She's an. The major sighed wearily. "It doesn't matter. Forget it. Do you know anyone else around here we should try asking?". The pacifist laughed knowingly. When the waitress approached, he waved her away. Then he produced. "Er. . . Shirley and Ci," Driscoll said. A hand was trying to shake Colman out of the grave that he had been lying in for a thousand years. "Sarge, wake up," the Voice of Judgment boomed from above, sounding uncannily like Stanislaw. "Hanlon wants you over at the main gate." "Is there a computer in the house?" Bernard called out. "At your service," a voice replied from the direction of the screen. "I answer to Jeeves, unless you want to {sake it something different." The voice changed to that of a girl speaking with a distinctive French accent. "Une petite francaise, possiblement?" Then it switched to a guttural male--"Karl, ze Bavarian butler, maybe?"--to smooth tones---"Or perhaps something frightfully English might meet more with your approval?"--and finally back to its original American. The sky goes away in the dark, and everything gets so big. I don't want her scared." "Someone you how?" Colman asked. "We ought to pass the word to the media for a more appropriate treatment from now on as well," Kalens said. "Perhaps playing up things like Chironian stubbornness and irresponsibility would harden up the public image a bit... just in case. We could get them to add a mention or two of signs that the Chironians might have armed themselves and the need to take precautions. It could always be dismissed later as overzealous reporting. Should I whisper in Lewis's ear about it?" scar tissue..commotion..wild beast. Her throat felt scorched. Her raw voice didn't sound like her own: wordless, thick, hideous. At any moment, however, one of them might retreat here to the bedroom. If a search by authorities. magnificent dimensions are matched by the size of her good heart. "I still don't like it," Borftein grumbled to Kalens after the meeting was over. "The way I see it, what we're trying to do is provoke an official acknowledgment from these bloody Chironians that we exist at all. If I had my way, I'd soon show them whether we exist or not." "Sure, I'd cover that." Distance to Chiron 1.9 billion miles; speed down to 1100 miles per second. Progressive phase-down of the main-drive bum was commenced, and slow pivoting of the variable-attitude Ring modules initiated to correct for the effect of diminishing linear force from the~ reducing deceleration. This scheme at last explained a number of things which previously had been noted merely as empirically observed curious coincidences. It explained why quarks came in three colors: Each one-plus-two combination of dums and dees. "You want a glass?" she asked. "The bottle's probably cleaner." "Has to be," she agreed as she headed. At last he asked in a strangely curious voice, "And if I did, what then, Celia?" "I hope you're not expecting an answer," Hanlon said. "It makes about as much sense to me as Greek .... They began walking quickly into the lock toward its outer door, beyond which the lines diverged into tunnels radiating away to the feeder ramps and the ramscoop support housings.. "You can count on it, sir," Stanislaw said..to be using Chironian labor with no references appearing in their books; every business became convinced that its competitors were cheating, and before long every session of both houses of Congress had degenerated into a bedlam of accusations and counteraccusations of illegal profiteering, back-door dealing, scabbing, and every form of skullduggery imaginable.. "As long as you think of me as a handicapped waif, your pity doesn't allow you to be impolite. On the..Jay began speaking earnestly and in a low voice. "My father asked me to find you. It's urgent. One of the people the SDs are looking for is at the house. Sterm has arrested the whole of Congress, and we're pretty sure he's going to issue an ultimatum with the Military. If they do the Chironians will take out the whole ship. Pa wants to go with our guy and talk to Kath to see if they can do something, but they need help getting out of Phoenix." Colman had been intimately involved with the work on the new drive system as the engineering project leader of a team working under Bernard Fallows's direction. He had brought Kath and their four-year-old son Alex up to the ship to be present with him at the unveiling ceremony being held in the main concourse of the new nose section. Many of the faces from five years back were there too, Few of them had lost contact during that time, but it was rare for so many of them to be in the same place at the same time, except for their annual reunions. Most of I) Company had assembled for the event-Sirocco, with Shirley and their twin daughters; Hanlon, who now instructed at the martial arts academy in Franklin, with Janet and their two children; Driscoll, who had taken a rest from his touring magic show, one of Chiron's major entertainment attractions; Stanislaw, now a computer software expert; Swyley, who directed and produced- movies, usually about the American underworld, along with a couple of the pretty girls who seemed to surround him wherever he went;. . and there were others. Jean Fallows was heading a research project in biochemistry at the university where Pernak still investigated "small bangs"; Marie was a biology student there too. Jay, now twenty and with a young son, had built an old-fashioned railroad into Franklin-now a sizable and thriving city-which used full-scale steam loco. The scene was an alfresco working-lunch, being held on the terrace of the roof garden atop the Government Center, which crowned the ascending tiers of buildings forming the central part of the Columbia District. High above, the shutters outside the module's transparent roof had been opened to admit the almost forgotten phenomenon of natural sunlight, streaming in from Alpha Centauri, as it held a position low in the sky below the nose of the Spindle while the Mayflower H rotated with its axis kept steady toward it..Micky finished her coffee in long swallows, as though she had forgotten
