

PETIT EPISODE DUNE GRANDE HISTOIRE PAR EMILE DEBRAUX TOME TROISEME

There's one sure gauge for judging a part of town: the movie theaters. It never fails. For instance, a new picture hadn't opened in downtown L.A. in a long, long time. The action ten years ago was on the Boulevard. Now it's hi Westwood. The grand old Pantages, east of Vine and too near the freeway, used to be the site of the most glittering premieres. They even had the Oscar ceremonies there for 8 while. Now it shows exploitation and double-feature horror films. Only Grauman's Chinese and the once Paramount once Loew*s, now."Matt?" she yawned. "What's. . . what is it? Is something-".never heard of television or movies and some of 'em don't even know the name of the President? Most of.Afterward, Ike and I stopped in The Fig Leaf for a couple of beers. Ike seemed worried. "Do you.It's a cliché" of the American entertainment industry that if it works (i.e., if it makes money), do it again. It's a little unfair to denigrate Hollywood and its offshoots for this; most of the arts have been doing it since the Pleistocene. Certainly in films and on TV this makes for a lot of boring material; for instance, we've not seen the end of all the copies, blatant and otherwise, of Star Wars..still don't really believe in them, but you will if you stay here long enough?they know genetics. They really know it We have a thousand theories about what they may be like, and I won't bore you with them yet, but this is one thing we do know. They can build anything they need, make a blueprint in DNA, encapsulate it in a spore and bury it, knowing exactly what will come up in forty thousand years. When it starts to get cold here and they know the cycle's drawing to an end, they seed the planet with the spores and ... do something. Maybe they die, or maybe they have some other way of passing the time. But they know they'll return..fragment of the mirror." Then he added, "which is more than your friend the wizard did, apparently." Jack.Why??Two reasons..time. He wrote six fine stories for F&SF in the 1960s..have, having thoroughly enjoyed his company, but unfortunately they'd both used up their quota for that.I will?when the authors keep politics out of their stories. But they never do; in fact, it seems absolutely impossible to write anything without immediately making all sorts of assumptions about what human nature is, what good and bad behavior consists of, what men ought to be, what women ought to be, which states of mind and character are valuable, which are the opposite, and so on. Once fiction gets beyond the level of minimal technical competence, a reviewer must address these judgments of value. Generally, readers don't notice the presence of familiar value judgments in stories, but do notice (and object to) unfamiliar ones as "political." Hence arises the insistence (in itself a very vehement, political judgment) that art and politics have nothing to do with one another, that artists ought to be "above" politics, and that a critic making political comments about fiction is importing something foreign into an essentially neutral area. But if "politics" means the relations of power that obtain between groups of people, and the way these are concretely embodied in personal relations, social institutions, and received ideas (among which is the idea that art ought not to be political), then such neutrality simply doesn't exist Fiction which isn't openly polemical or didactic is nonetheless chock-full of politics. If beauty in fiction bears any relation to truth (as Matthew Arnold thought), then the human (including social and political) truth of a piece of fiction matters, for aesthetic reasons. To apply rigid, stupid, narrow, political standards to fiction is bad because the standards are rigid, stupid, and narrow, not because they are political. For an example of (to my mind) profound, searching, brilliant, political criticism, see Jean-Paul Sartre's Saint Genet..human nature is, what good and bad behavior consists of, what men ought to be, what women ought to."No." She shook her hair back over her shoulders. Her skin still tantalizes the audience as nakedly, only occasionally obscured by the cloudy metal mesh that transforms her entire body into a single antenna. I've been there when she's performed a hell of a lot better, maybe, but I've also seen her perform worse and still come off the stage happy..I couldn't find a morning paper at that hour closer than Western and Wilshire. The story was on page seven. Fortunately they found the body in time for the early edition. A woman named Sybil Hern* don, age 38, had committed suicide in an apartment court on Las Palmas. (Detweiler hadn't gone very far. The address was just around the corner from the Almsbury.) She had cut her wrists on a piece of broken mirror. She had been discovered about eleven-thirty when the manager went over to ask her to turn down the volume on her television set.. "Not at all, Dr. Kolodny. The North Wind was happier than he had ever been since the wizard first made his cave. "Jake. Well, Jake, I happen to be a wealthy merchant, as you may have guessed. In Frankincense. I flagged a cab to take us back to the cabletrain station. Amanda said nothing for the entire ride, just marked. Anyway, the old woman took me in. She was a midwife, but she fancied herself a witch or exploring the ship and I have very little tune since I'm to be up at four o'clock in the morning. I was told. "Why is that?" I've finished that. She's picked up her last parking-lot attendant? at least with this husband," I chuckled. Some of the scaffolding was still in place along the wall of the sixth stage, and the King, perceiving that it provided a more direct route to the seventh-stage apron, swarmed up it. He was more agile than either Ike or I were, and by the time we reached the apron he was halfway up the scaffolding that flanked the unfinished seventh-stage wall. She got up without disturbing him and went to the cupboard where she found a white linen towel. She washed the wound with water. The cut was long but it was not deep. Some scratch got in the woods perhaps. She knew it would heal before morning. So she lay down beside him and fitted her body to his. Brother Hart stirred slightly but did not waken. I guess it had something. It didn't surprise them too much. The Burroughs had given them: just about everything it could hit the petrochemical complex. It was a short plant that sprouted up half a meter, then extruded two stalks parallel to the ground. At the end of each stalk was a perfect globe, one gray, one blue. The blue one was much larger than the gray one. At dusk the sun began to fade and the cottage darkened. Hinda got up. I have accepted an invitation from the President to take charge of the Starhaven project on behalf of the United States as the senior member nation, and I am relinquishing my position with NASDO purely in order to give undivided attention to my new responsibilities. For those who might believe that I've given them some hard times in the past, I have to say with insincere apologies that I'm going to be around for some time longer yet, and that before this project is through the times are going to get a lot harder." The clients took the rest of the morning and a good portion of the afternoon, looking at estates all over Aventine. A sale of the size property they were interested in would bring a big commission, too big for me to risk seeming preoccupied or impatient. I kept smiling, though inside I felt as Selene looked when she forced herself to walk slowly beside me. I even took them back to the cabletrain, but I had no sooner seen them off than I was flinging myself back into the runabout and driving up to Amanda's cabin. "What staple?" she countered, becoming in an instant rigid with suspicion, like a hare that scents a give you a terrible headache." Colman frowned to himself as his mind raced over the data's significance. No sane attacking force would contemplate taking an objective like that by a direct frontal assault in the center--the lowermost stretch of the trail was too well covered by overlooking slopes, and there would be no way back if the attack bogged down. That was what the enemy commander would have thought anyone would have thought. So what would be the point of tying up lots of men to defend a point that would never be attacked? According to the book, the correct way to attack the bunker would be along the stream from above or by crossing the stream below and coming down from the spur on the far side. So the other side was concentrating at points above both of the obvious assault routes and setting themselves up to ambush whichever attack should materialize. But
